**WATER TREADMILL**  
HYDRO WORK 100F

**Features:**

- \* An AC electric drive motor, allowing speed regulation from 0.2 to 12 km/h
- \* SOFT start/stop capability treadmill
- \* A 7-inch crown screen for control and adjust all values
- \* Smart switchboard
- \* A 2000-liter three-layer anti-algae side tank
- \* Water heating system with temperature control (gas heating system)
- \* Electric shock protection system inside the tank
- \* Pumping station for filling and draining water
- \* Jet pump system inside the treadmill for massaging and creating movement resistance to increase muscle engagement
- \* Water purification and filtering system
- \* 18 mm unbreakable tempered glass
- \* Side handles for the patient's convenience
- \* Consists a seat for the patient to sit
- \* Interior treadmill illumination
- \* Steel ramp stairs

**WATER BIKE**  
HYDRO BYC01

**Features:**

- \* Weight: 22.5 kg
- \* Standard length 120 cm
- \* Standard width 66 cm
- \* Unique design with minimum storage space
- \* Has a resistant pedal
- \* Steel and plastic body material
- \* Depth of use ranging from 100 to 140 cm
- \* Produced from first-class material
- \* Use without the need for blue shoes
- \* Capable of being set up on a treadmill
- \* Capable of being secured to the bottom of the pool during use
- \* Avoiding water-polluting substances such as greasing oil

## CPM FIZYO FLEX 2000

### Features:

- \* Adjustable angle range spanning from -10 to 127 degrees
- \* Advanced electronic system
- \* A keyboard and screen for setting and displaying flexion/extension angles
- \* Comparatively lightweight among similar devices
- \* Consists of a completely silent and non-slip angle sensor
- \* Strap and soles made from highly comfortable, soft towel material
- \* Adjustable levers for all heights (leg length)
- \* Patient-specific emergency stop treatment button

## TRACTION TX 400

### Features:

- \* 5 inch color screen
- \* Advanced electronic design system
- \* Static-Intermittent-ADJ therapy modes
- \* Real time monitoring of all performance stages
- \* Pulling force capacity of up to 990 N (99 kg)
- \* Individually adjustable treatment variables
- \* Safety mechanism for pulling weights exceeding 20 kg
- \* Patient-specific emergency stop treatment button
- \* Robust metal frame with electrostatic powder coating

**ITEM NO: PT 00028**  
**ITEM CODE: 04423**  
**MANIPULATION BED**

LAN 200

**MANIPULATION BED**

LAN 102

**Features:**

- \* Three breakers
- \* Dual motor system, each boasting 6000N (600kg) power, for adjusting both height and the central break
- \* Controller handset for height and central break angle adjustments.
- \* Incorporate a pedal to regulate wheel contact with the surface during movement
- \* Capability to adjust the back angle according to preference
- \* Locking mechanism for adjusting the back angle to preferred positions
  - \* Suitable for regular therapy exercises
  - \* Capability to mount massage handles
  - \* Electrical system with IP66 standard
- \* Dust and moisture-resistant, and easy to wash
- \* Jelly wheels with anti-static properties and locking capability
- \* ST37 profile skeleton with reinforced chassis
  - \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

## BED AND TILT TABLE

### LAN 402

#### Features:

- \* Dual motor system, each boasting 6000N (600 kg) pushing power
- \* Capability to independently and concurrently adjust both height and tilt angle
- \* Patient grip and seating arrangement
- \* Electrical system with IP66 standard
- \* Dust and moisture-resistant, and easy to wash
- \* A pedal or a handset for adjusting the height or tilt angle
- \* High quality plastic wheels with anti-static properties and locking capability
- \* ST37 profile skeleton with reinforced chassis
- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

## BED AND TILT TABLE

### LAN 401

#### Features:

- \* One-motor system, boasting 6000N (600 kg) pushing power
- \* Capability to adjust the bed's height
- \* Patient grip and seating arrangement
- \* Electrical system with IP66 standard
- \* Dust and moisture-resistant, and easy to wash
- \* A pedal or a handset for adjusting the height or tilt angle
- \* High quality plastic wheels with anti-static properties and locking capability
- \* ST37 profile skeleton with reinforced chassis
- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

## TRACTION BED LAN 120

### Features:

- \* Ability to perform neck traction while sitting for the patient
- \* Ultra-smooth and noiseless linear motor, boasting 6000N power for height adjustment
- \* Electrical system with IP66 standard
- \* Dust and moisture-resistant, and easy to wash
- \* A handset controller for adjusting the height
- \* High quality plastic wheels with anti-static properties and locking capability
- \* Capability to adjust the back to the desired angle and lock in place
- \* ST37 profile skeleton with reinforced chassis
- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

## TRACTION BED LAN 110

### Features:

- \* Ability to perform neck traction while sitting for the patient
- \* No engine
- \* Fixed height
- \* Dust and moisture-resistant, and easy to wash
- \* High quality plastic wheels with anti-static properties and locking capability
- \* Capability to adjust the back to the desired angle and lock in place
- \* ST37 profile skeleton with reinforced chassis
- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

## BED UNDER THE FRAME TRIFOLD FOLDING

### Features:

- \* Three-layer anti-sweat leather
- \* Convenient folding and portability
- \* The complete frame coated with electrostatic powder paint

## FRAME BED (BED WITH SIDE FRAME)

### Features:

- \* Three-layer anti-sweat leather
- \* Convenient folding and portability
- \* The complete frame coated with electrostatic powder paint

## EXAMINATION BED FOLDING

### Features:

- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

**WITH FOLDING BREAKER**

**WITHOUT FOLDING BREAKER**

## EXAMINATION BED SIMPLE

### Features:

- \* Three-layer anti-sweat leather
- \* The complete frame coated with electrostatic powder paint

**WITH BREAKER**

**WITHOUT BREAKER**

## IR IPS.02

### Features:

- \* Two flames
- \* Dimmer and digital timer
- \* Unique design with minimal cabin space requirement
- \* Independent motion of two arms in every direction
- \* User-friendly with the capability to maneuver the arms effortlessly in all directions
- \* Lamp holder protector ensuring optimal safety

## IR IPS.01

### Features:

- \* single flame
- \* Dimmer and digital timer
- \* Unique design with minimal cabin space requirement
- \* User-friendly with the capability to maneuver the arm effortlessly in all directions
- \* Lamp holder protector ensuring optimal safety

## IR IPD.01

### Features:

- \* Dimmer and digital timer
- \* Can be mounted on the bed or cabin wall
- \* Longitudinal motion along the rail spanning the entire bed
- \* Unique design with minimal cabin space requirement
- \* User-friendly with the capability to maneuver the arm effortlessly in all directions
- \* Lamp holder protector ensuring optimal safety

## HOT PACK

HP FULL

ITEM CODE:02091

ITEM NO: PT 00016

### Features:

- \* Gas/electric, large size
- \* Two shells
- \* Size 80\*45\*60 cm
- \* Equipped with an additional element
- \* Insulation of the device door using fire-resistant rubber, minimizing heat loss
- \* Includes a volume control for temperature adjustment

## PARAFFIN BATH

PB 100-110

### Features:

- \* Electric, large and medium size
- \* Heat transfer without the requirement for water
- \* Includes a volume for temperature adjustment

## SET GATE TRAINER

### Features:

- \* A Lifter with a weight-bearing capacity ranging from 60 to 135 kg
- \* A Treadmill designed for patients, ideal for neurologically focused walking exercises
- \* A Parallel with adjustable height
- \* Separate slings for adults and children
- \* Offers diverse training programs and the option to train on an inclined treadmill ramp
- \* Operates continuously for six hours with battery power

## PATIENT LIFTER

### Features:

- \* Single motor (capable of lifting up to 135 kg)
- \* Swiss BIBUS engine with a capacity to withstand 6000N (600 kg) of pushing force
- \* Weight: 40 kg
- \* Suitable for use in residences, physiotherapy centers, and hospitals
- \* Spreader bar equipped with two to four hooks
- \* Option to include a backup battery
- \* The entire frame covered with stainless electrostatic powder paint.
- \* Unique design, Offering a high level of stability for optimal safety.

## PARALLEL BAR FOUR BARS

### Features:

- \* Adjustable height for all four bars
- \* Beautiful and unique design
- \* Available in a variety of colors

## PARALLEL BAR TWO BARS

### Features:

- \* Adjustable height for both bars
- \* Beautiful and unique design
- \* Available in a variety of colors

**ITEM NO: PT 00001**  
**ITEM CODE: 09907**  
**QUADRICEPS CHAIR**  
**NEW DESIGN**

**Features:**

- \* Fully standard body design
- \* Straightforward and equipped with wheeled bases
- \* Available in a variety of colors

**ITEM NO: PT 00022**  
**ITEM CODE: 00131**  
**SHOULDER WHEEL**  
**WOODEN RUDDER**

**Features:**

- \* Digital counter
- \* Adjustable height

## THREE-STORY METAL TROLLEY TR103

### Features:

- \* Three floors
- \* Floor pages
- \* Elegant design
- \* Electrostatic powder paint metal plates
- \* Crafted through laser cutting
- \* Excellent quality

## DOUBLE-DECKER METAL TROLLEY TR102

### Features:

- \* Two floors
- \* Floor pages
- \* Elegant design
- \* Electrostatic powder paint metal plates
- \* Crafted through laser cutting
- \* Excellent quality

## DOUBLE DECK TROLLEY TR202

### Features:

- \* Two floors
- \* Elegant design
- \* High quality ABS material
- \* Crafted through laser cutting
- \* Excellent quality

**STOOL**  
JACK INCLUDED

**ITEM NO: PT 00024**  
**ITEM CODE: 09605**

**Features:**

- \* Incorporates a jack for adjusting the height

**STOOL**  
SIMPLE WITHOUT JACK

**Features:**

- \* Simple without jack

**STAIRS NEXT TO THE BED**  
TWO STAIRS

**Features:**

- \* Two stairs

**STAIRS NEXT TO THE BED**  
ONE STAIR

**Features:**

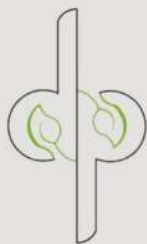

- \* One stair
